Founder and Managing Partner, MIT Partners GmbH, 08.2016-

Mr Juha Mylläri is a professional enterprise architect with a strong background in facilitating the interface between business and technology. He has over 25 years of international hands-on experience in various ICT roles in energy, telecom, engineering, manufacturing, banking, insurance, and public administration verticals. In his previous roles, he was accountable for software development, project- and program management, business development, technology consulting, strategic IT planning and governance, enterprise architecture, and innovation management. With his company MIT Partners he assists midsized and large companies to set up sustainable IT Governance and Enterprise Architecture management processes and practises and takes over hands-on enterprise architecture roles ad interim and on demand.

Recent experience

Chief Enterprise Architect, Cantonal administration, CH, 2023-
Ad-interim role in developing a federated, collaborative enterprise architecture governance framework. Defining the concept, roles, processes, stakeholder management, and stakeholder communication.

Enterprise Architect, Regional bank, CH, 2023-
Concept and implementation of a strategic regulatory initiative for End-User-Computing application governance. End-to-end responsibility for solution concept, governance process and guideline design, asset inventorisation, risk evaluation, and integration into the bank GRC and process management frameworks.

Enterprise Architect, Swiss Public Administration, CH, 2022-23
Software Quality Review to evaluate the architecture, code- and nonfunctional quality of legacy software applications (mission critical, national COVID-19 data aggregation and organ transplantation platforms for the Swiss governmental national public health administration agency). Defining the strategy, required activities, and roadmap for the target architecture.

Transformation Manager, Energy Utility, CH, 2021-2023
Responsible for the C-level stakeholder management, concept, and implementation of a business transformation program, incl. setup of an Enterprise Architecture practice, solution architectures, and evaluation of the strategic platforms based on SAP S/4 ERP and Microsoft Dynamics 365 CRM.

Lead Enterprise Architect, Military MRO Provider, CH, 2021-22
Digital Transformation of a national provider of military maintenance and repair (MRO) organization. Concept and design of a zero-trust cybersecurity architecture and customer-partner API-management program.

Head of IT-Architecture, Innovation and Security, Public Transportation and Cargo Logistics provider, CH, 2019-20
Ad-Interim management and line responsibility at a national public transportation and cargo logistics provider.

Enterprise Architect, International Insurance Group, CH, 2018-19
Responsible for a strategic Information and Data Management program, incl. design of the corporate-wide Business Data Model as a central concept for the entire programme. Governance concept, setup, and support for implementation projects in Data Provider Services department.

Chief Enterprise Architect, Global industrial manufacturer of heating and energy equipment, DE, 2019
Ad-Interim management and setup of a new Enterprise Architecture practice (incl. EA strategy, roles and responsibilities, processes, EA community, business capability model, enterprise data model, consolidation of architecture inventories, etc...).

Enterprise Architect, Mylläri IT Consulting, CH, 2016-2018
Coaching, methodological, and onboarding support for over 30 international companies in the DACH region in introducing the worldwide leading Enterprise Architecture tool solution into their Enterprise Architecture practice.
